

# Schur® Star Light

## The flexible and compact bagging system with numerous options

The Schur® Star Light Concept, consisting of a packing machine together with premade bags, is the compact and easy-to-go solution for optimization of your production process. The concept facilitates market lead time reduction, offering efficiency, flexibility and reliability.

## Advantages

- |                                                                                                              |                                                                                        |
|--------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------|
| • Power on & pack                                                                                            | • Low investment                                                                       |
| • High automation                                                                                            | • Re-closable bags                                                                     |
| • Easy to integrate into existing process                                                                    | • Easy to operate, maintain and clean                                                  |
| • Low weight unit with small footprint                                                                       | • Wheels allow effortless placement and relocation                                     |
| • Comprehensive bag style range in combination with an integrated zipper, make up a unique matrix of options | • Machine comes complete and run multiple bag formats without additional tooling costs |

## Technical specifications

### Model

Schur® Star Light, Stainless steel AISI 304, on wheels.

### Bag feeding

Intermittent, single index. Manual, semi or fully automatic.

### Packaging speed

Variable, up to 25 bags/min.

### Product weight

Max. 2,5 kg (2.2 pounds) per bag.

### Bag change-over

3 min.

### Machine dimensions

L: 2,3 x W: 0,7 x H: 1,2 m

### Power supply

115/230 VAC, 1 phase + N, 50/60 Hz, 2.0 kW

### Compressed air

Not required.

### Combine with

Scales, filling and counting units, labelling unit.

## Bag specifications

### Type

Schur® Star Light bag with zipper.

### Versions

Bespoke bags made to order.

### Construction

Pillow bags, stand-up bags - Doy style or K-seal.

### Bag dimensions

Max.: Width 300 mm (11.8"), length 400 mm (15.8")

Min.: Width 100 mm (4"), length 100 mm (4")

### Materials

Mono films, laminated structures.

### Features

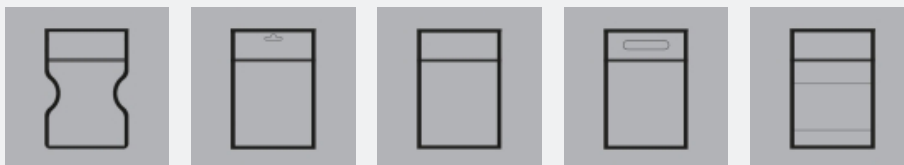

Window, ventilation holes, euro-slots, valves, tear-strip, handles, laser score.

### Print

Unprinted or with up to 10 colours, including a range of lacquer features. Production data can be printed in-line with the inclusion of the printer option.

## Bag constructions

### PILLOW BAGS

### STAND-UP BAGS DOY

### STAND-UP BAGS K-SEAL
